

OEM 27301-03200 2730103200 Hyundai Automotive Engine Ignition Coil

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 27301-03200
- Minimum Order Quantity: 10 PCS
- Price: \$2.88 ~ \$3.88
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box, Standard tray
- Delivery Time: 3~30 work days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 100000 pcs per month

Product Specification

- Product Name: Ignition Coil
- Warranty: 24 Months
- Car Make: For Hyundai
- Package: PVC Bag With Cartons, After Wooden Pallets
- Quality: 100% Tested
- Size: Standard
- Highlight: 27301-03200, 2730103200

Product Description

27301-03200 Ignition Coil for Hyundai Accent 2014-2017 2730103200

Product Description:

The ignition coil is a critical component used in automotive engines. It is responsible for transforming low-voltage electrical current into high-voltage pulses to ignite the fuel mixture. In other words, it is essential for a car to start, run and idle without difficulty.

Features:

The ignition coil offers superior performance under various operating conditions. Utilizing advanced technology, it efficiently produces sufficient voltage to reliably ignite the fuel mix, resulting in strong power and excellent combustion efficiency. This product is also incredibly durable and reliable. Crafted from high-grade materials and manufacturing techniques, it can tolerate the strain of high temperatures, shocks, and other extreme environmental conditions, ensuring long-term stability and effectiveness. Furthermore, it provides accurate ignition timing and energy output to suit the engine's requirements. The ignition coil also boasts the capability to react flexibly to variations of engine load and RPM, bringing out superb ignition performance. In addition, it comes with a compact design for easy installation. It also features conventional connection interfaces to combine seamlessly with existing ignition systems. Finally, it presents a wide compatibility range for different car manufacturers and engine models. The coil is designed and developed according to the original specifications and standards, making sure that they are completely compatible with the specific vehicle model's ignition systems.

Technical Parameters:

This is an ignition coil of standard size made for Hyundai vehicles. The original equipment manufacturer (OEM) code is 27301-03200. It is constructed of the materials PPO/PBT/Rubber/Special plastic and is capable of withstanding temperatures of -40 to 120° Celsius. In addition to open-current testing, this battery has been tested for thermal shock, salt spray, and high temperature endurance. It has powerful ignition energy and high voltage, and each part undergoes 100% inspection before shipment.

Applications:

Ignition Coils Essential to Internal Combustion Engines

Ignition coils are an integral part of many internal combustion engines, from cars and motorcycles to marine and industrial engines, and are essential in performance and racing applications. They produce the high-voltage sparks that ignite the air-fuel mixture in the engine's cylinders, thus guaranteeing the correct combustion and proper functioning of the engine.

Ignition coils are commonly used in passenger cars, motorcycles, trucks, and other vehicles that operate using internal combustion engines. Without them, combustion and engine performance would suffer.

Support and Services:

Auto Ignition Coil Technical Support and Service provides a wide range of services to ensure your product is in top condition. Our services include:

Diagnostic testing and troubleshooting

Repair and replacement of faulty components

Product upgrades and improvements

Software updates

Regular maintenance and tune-ups

Warranty coverage

Our team of experienced technicians is available 24/7 to provide you with the highest quality support and service. We strive to ensure your product is running optimally and that you are completely satisfied with our service.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specializing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts, electric parts, steering parts, transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;
Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
